

SUPPLEMENTARY FIGURE. Monthly deaths by race/ethnicity* as a percentage of all COVID-19–associated deaths (N = 114,411) reported to the National Vital Statistics System, stratified by age group[†] (≤65 years and >65 years) and U.S. Census region — United States, May–August, 2020

Abbreviation: AI/AN = American Indian or Alaska Native; NH = non-Hispanic; NHPI = non-Hispanic Native Hawaiian or other Pacific Islander

* The dotted lines represent the percentage of Hispanic or Latino residents for each region and age group based on U.S. 2019 Census data. Race or ethnicity data were unknown for 465 (0.4%) deaths. Total numbers of deaths might vary because of suppression of cells with <10 deaths.

[†] Age data were missing for 2 (<0.01%) COVID-19 deaths
