

SUPPLEMENTARY FIGURE. Cabin and residence hall assignments,* COVID-19 cases status,[†] and serologic results for students (n = 127), counselors (n = 21), and staff members (n = 4) — overnight summer-school retreat,^{§¶} Wisconsin, July–August 2020

Abbreviation: COVID-19 = coronavirus disease 2019.

* Each block represents one person, and each grouping represents a shared dormitory room or yurt. Figure is not drawn to scale or intended to depict geographic layout at the retreat or sleeping arrangements within rooms.

† A confirmed COVID-19 case was defined as receipt of a positive SARS-CoV-2 reverse transcription–polymerase chain reaction (RT-PCR) test result after July 2 in a retreat attendee. A probable case was an illness meeting clinical criteria for COVID-19 with symptom onset July 2–August 11 in a retreat attendee not tested by RT-PCR, or with a negative RT-PCR result from a sample taken at least 10 days after symptom onset.

§ Abbott Architect SARS-CoV-2 Immunoglobulin G chemiluminescent microparticle assay performed on serum specimens collected during August 5–6; only shown for attendees who were probable cases.

¶ Based on documentation provided by retreat attendees from a laboratory of any SARS-CoV-2 serologic test done within 3 months before the retreat.
