Compare Trends in COVID-19 Cases and Deaths in States in the US Reported to CDC

USA
8,387,047
TOTAL CASES
+74,380 New Cases
CDC | Updated: Oct 23 2020 1:49PM

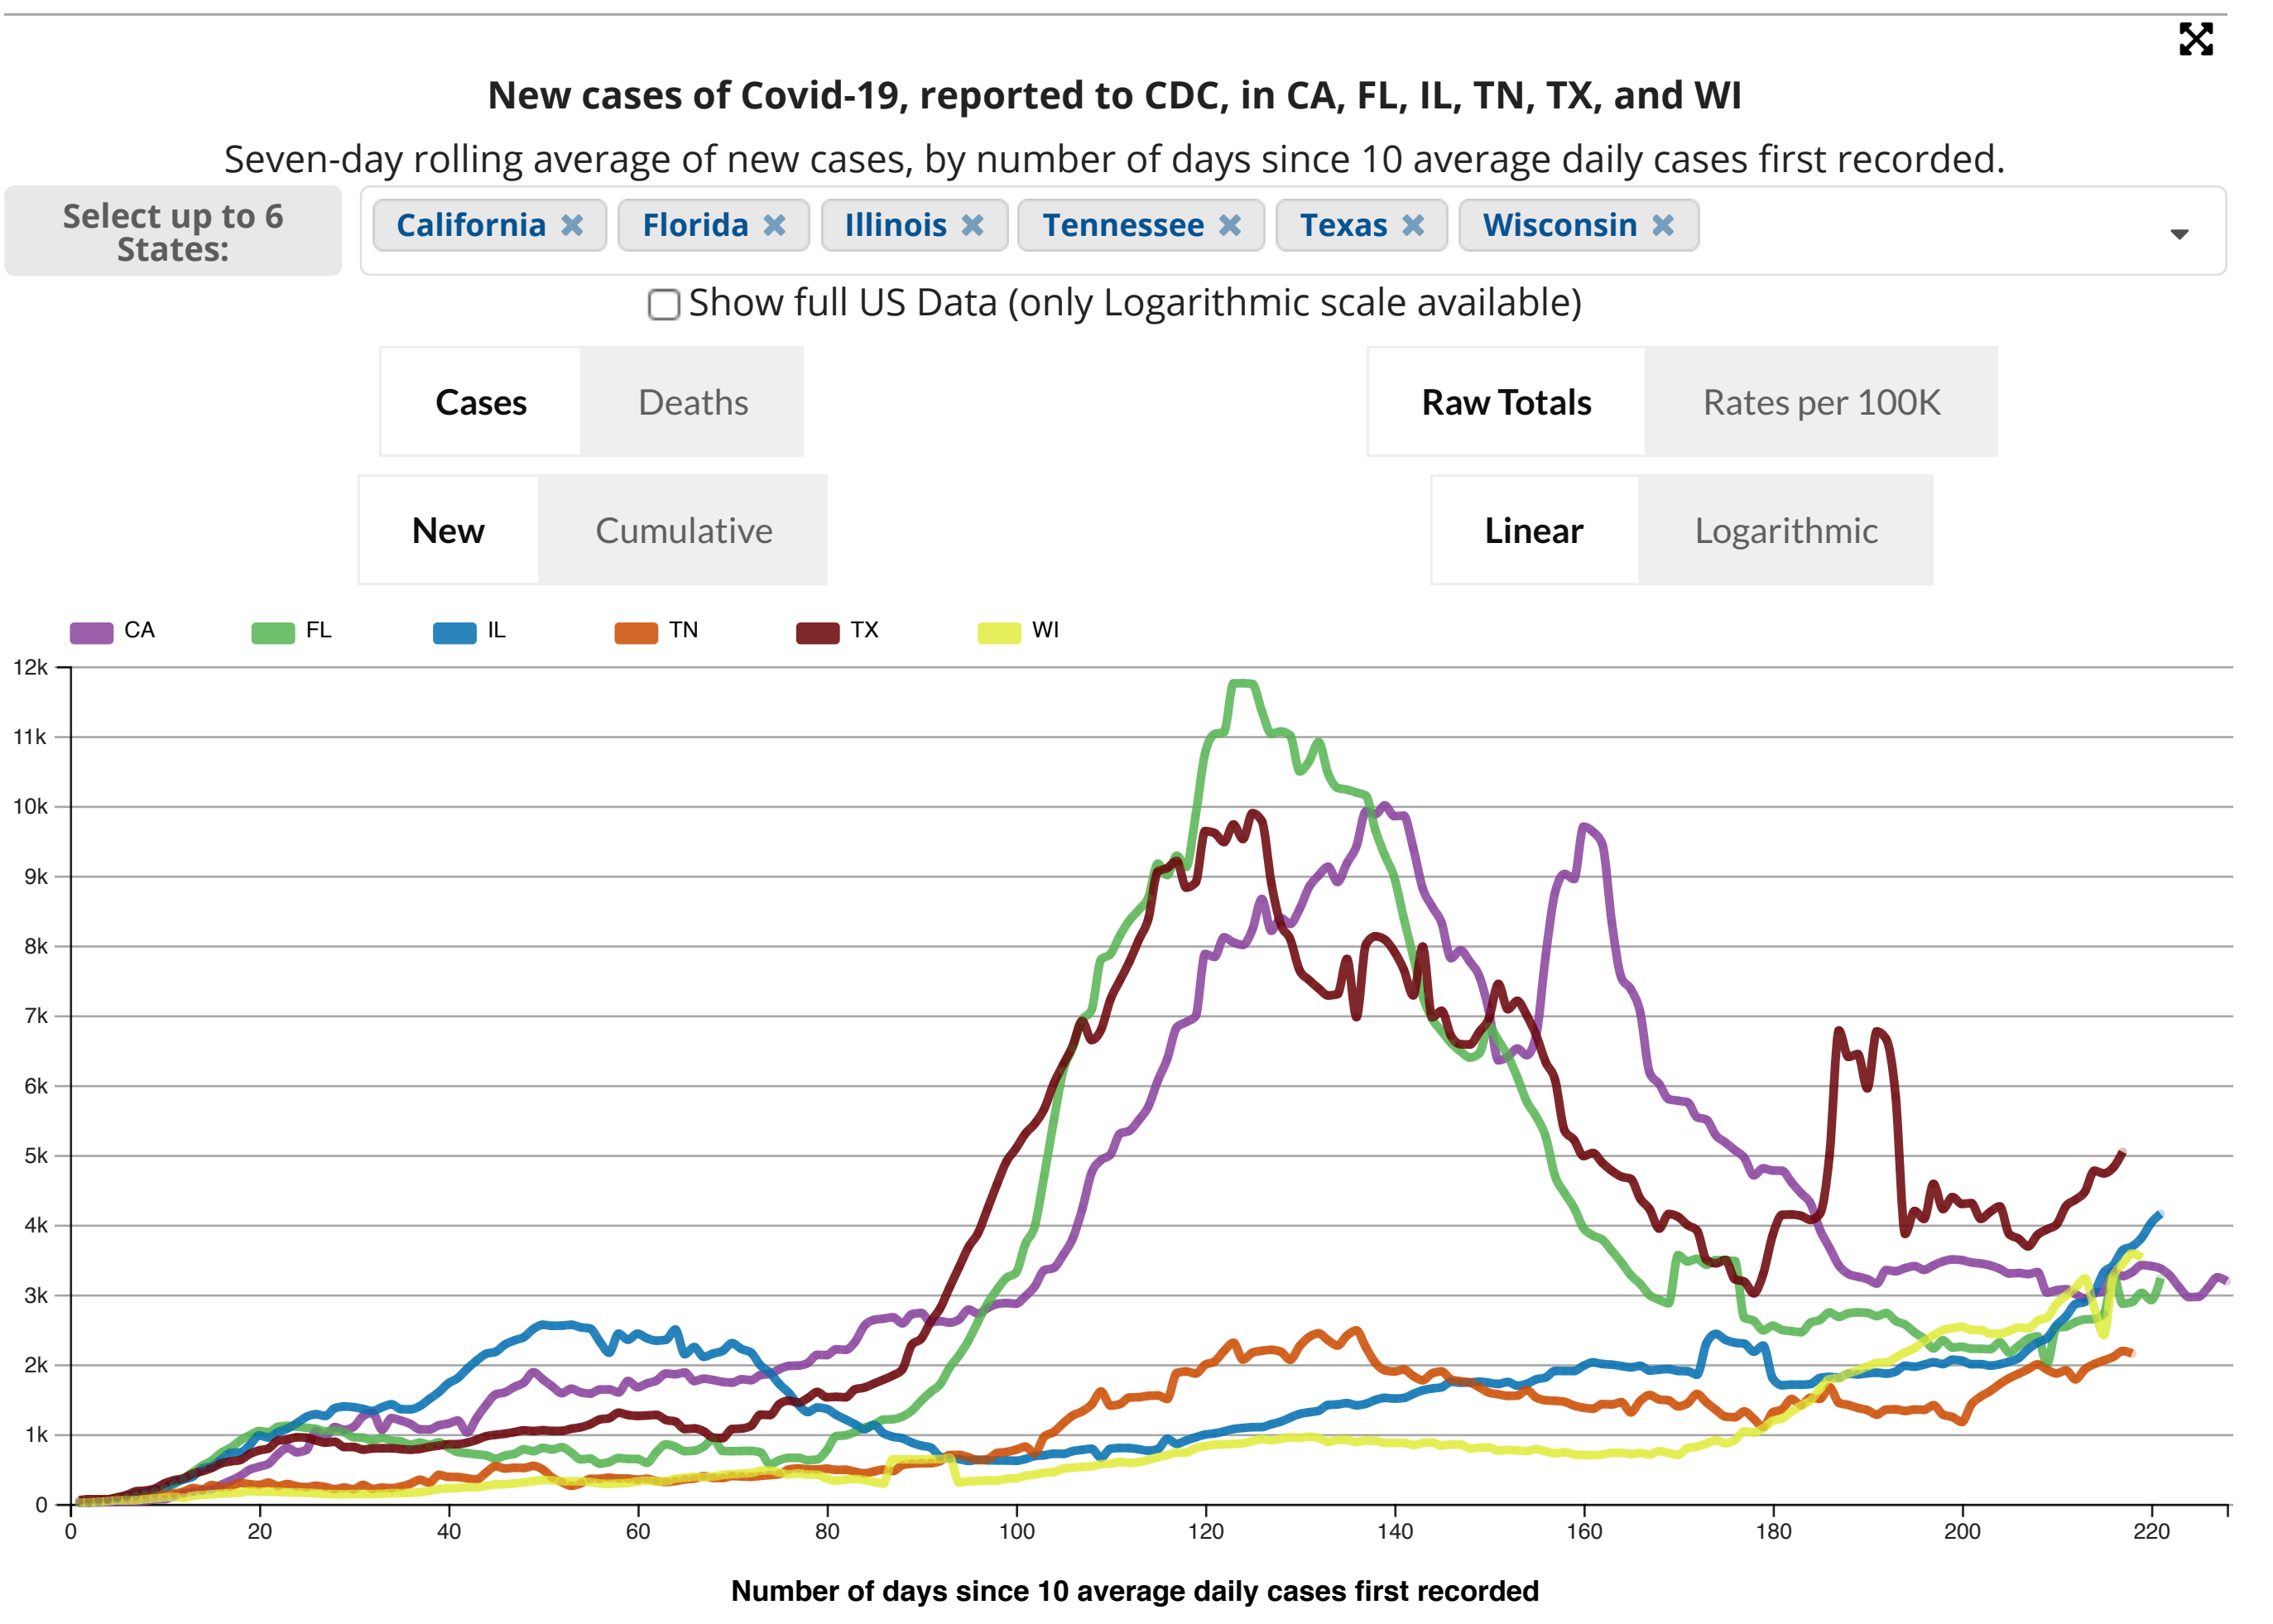

USA
222,447
TOTAL DEATHS
+1,009 New Deaths
CDC | Updated: Oct 23 2020 1:49PM

USA
2,534
Cases per 100,000 People
CDC | Updated: Oct 23 2020 1:49PM

Seven-day rolling average of new cases

Day	CA	FL	IL	TN	TX	WI
1	16	17	13	19	52	14
2	17	25	20	28	66	21
3	19	39	37	49	65	28
4	25	51	55	66	64	37
5	29	68	79	80	93	50

CDC | Updated: Oct 23 2020 1:49PM

Data Sources, References & Notes: Total cases are based on aggregate counts of COVID-19 cases sent by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. Case and death data are charted from date of first case/death rather than calendar date. The numbers are confirmed and probable COVID-19 cases as reported by U.S. states and U.S. territories. When not available to CDC, this is annotated by N/A.

Rates are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The chart shows total cases per state, new cases in the last 7 days per state, and the rate (cases/100,000) per state. The 7-day moving average of new cases (current day + 6 preceding days / 7) was calculated to smooth expected variations in daily counts.

Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ. *Counts for New York City and New York state are shown separately; data for New York State show total cases and deaths for the State excluding data for NYC.
