

**SUPPLEMENTARY FIGURE 1.** Weekly Percentage Change\* in Total Emergency Department Visits and Mental Health-Related ED Visits Among Children Aged <18 Years, January–October 2020 Compared with the Corresponding Week in 2019†

\* Data source: National Syndromic Surveillance Program (NSSP), United States

† Percent change was calculated for each week as (2019 total number of mental health-related ED visits for week X - 2020 total number of mental health-related ED visits for week X) / Total number of mental health related ED visits for week X, 2019 x 100.
