Data Table for Death Rate by State/Territory

CDC | Updated: Nov 18 2020 1:07PM

State/Territory	Death Rate per 100,000
New York City*	287
New Jersey	186
Massachusetts	149
Connecticut	133
Louisiana	132
Mississippi	120
Rhode Island	120
North Dakota	103
District of Columbia	93
Arizona	88
Illinois	88
Georgia	85
Michigan	85
New York*	85
Florida	82
South Carolina	81
Delaware	76
Indiana	75
Arkansas	74
Pennsylvania	73
South Dakota	73
Maryland	72
Texas	68
Alabama	67
Iowa	64
Nevada	64
New Mexico	60
Tennessee	59
Missouri	56
Guam	55
Minnesota	53
Montana	51
Ohio	49
Wisconsin	49
California	46
North Carolina	46
Colorado	45
Idaho	45
Virginia	45
Kansas	43
Nebraska	42
Oklahoma	40
Kentucky	37
New Hampshire	37
Washington	34
West Virginia	33
Puerto Rico	30
Wyoming	26
Utah	23
Virgin Islands	21

Data Sources, References & Notes: Total persons are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. The numbers are confirmed and probable COVID-19 cases as reported by U.S. states, U.S. territories, New York City, and the District of Columbia from the previous day. *Counts for New York City and New York state are shown separately; data for New York State show total cases and deaths for the State excluding data for NYC. When not available to CDC this is annotated by N/A. Rates are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The map shows total cases per state, new cases in the last 7 days per state, and the rate (cases/100,000) per state. The 7-day moving average of new cases (current day + 6 preceding days / 7) was calculated to smooth expected variations in daily counts. Demographic data for deaths is based on a subset of cases where case-level data is available. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ.
