FROM THE NATIONAL CENTER FOR HEALTH STATISTICS

Death Rates* from Unintentional Falls[†] Among Persons Aged ≥65 Years, by Age Group — National Vital Statistics System, United States, 1999–2018

^{*} Deaths per 100,000 population.

From 1999 to 2018, death rates from unintentional falls among persons aged \geq 65 years increased among all age groups. The largest increase occurred among persons aged \geq 85 years, from 110.2 per 100,000 in 1999 to 270.5 in 2018. For persons aged 75–84 years, the rate increased from 31.5 to 63.1, and among those aged 65–74 years, the rate increased from 9.0 to 16.8. Throughout the period, rates were highest among persons aged \geq 85 years, followed by rates among persons aged 75–84 years, and were lowest among persons aged 65–74 years.
