## United States COVID-19 Cases and Deaths by State

Reported to the CDC since January 21, 2020

TOTAL CASES

11,843,490

+192,673 New Cases

DEATHS IN LAST 7 DAYS

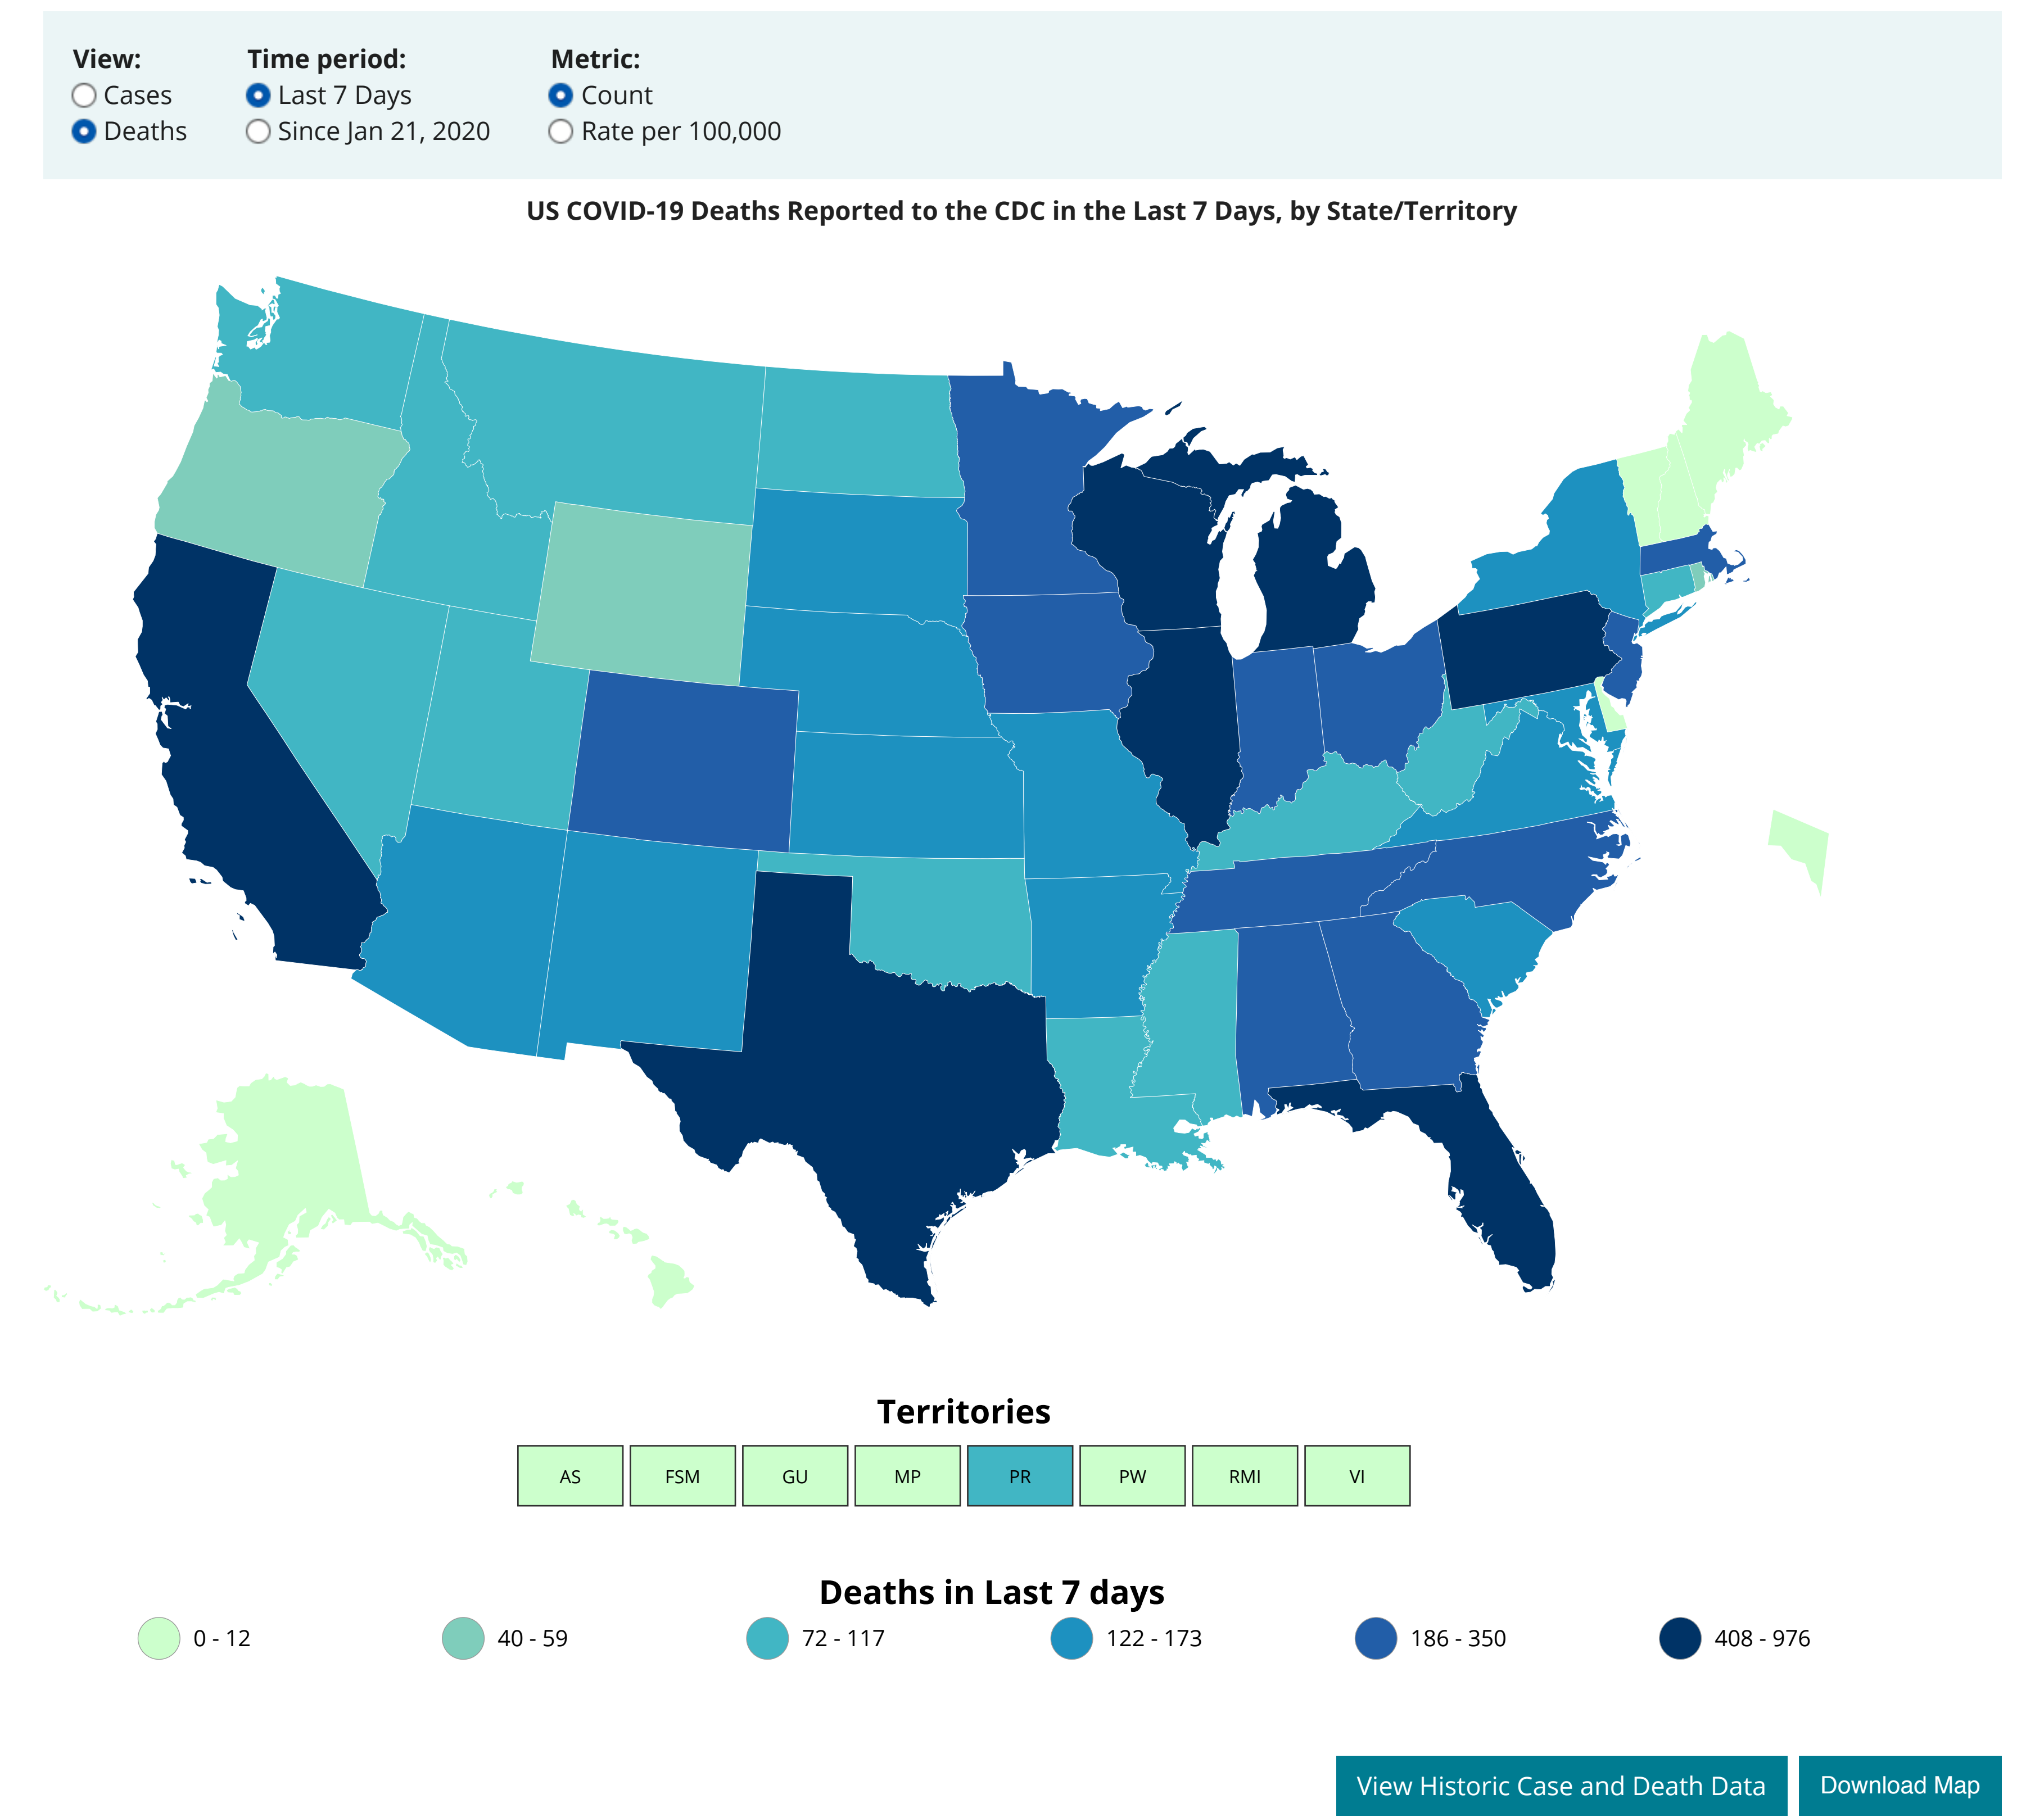

10,042

TOTAL DEATHS

253,600

+1,885 New Deaths

CDC | Updated: Nov 21 2020 12:16PM

### Data Table for Deaths in Last 7 days by State/Territory

CDC | Updated: Nov 21 2020 12:16PM

[View and Download](#) COVID-19 Case Surveillance Public Use Data

**Data Sources, References & Notes:** Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. The numbers are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The map shows total cases per state, new cases in the last 7 days per state, and the rate (cases/100,000) per state. The 7-day moving average of new cases (current day + 6 preceding days / 7) was calculated to smooth variations in daily counts. Demographic data for deaths is based on a subset of cases where case-level data is available. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ.
