As of 23 November 2020

 [PNG - 745 KB]

Footnote: Electronic case reporting (eCR) is the automated, real-time exchange of case report information between electronic health records and public health agencies. In partnership with the Association of Public Health Laboratories (APHL) and the Council of State and Territorial Epidemiologists (CSTE), CDC has been rapidly onboarding healthcare facilities to eCR during the COVID-19 pandemic. As of November 23, 2020, more than 6,300 facilities are sending COVID-19 electronic initial case reports to public health using eCR.
