Reported to the CDC by State or Territory

View: Cases/Deaths Measure: Daily/Cumulative Metric: Raw Totals/Rate per 100,000 Scale: Linear/Logarithmic

Select up to 6 states or territories: California, Florida, Illinois, Michigan, Ohio, Texas

Cumulative cases of Covid-19, reported to CDC, in CA, FL, IL, MI, OH, and TX

Cumulative cases, by number of days since 100 total cases first recorded.

Data Table for Cumulative cases

CDC | Updated: Dec 3 2020 12:17PM

Table with columns: Day, CA, FL, IL, MI, OH, TX. Contains daily cumulative case counts for each state from Day 1 to Day 269.

Data Sources, References & Notes: Total cases are based on aggregate counts of COVID-19 cases sent by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020...

Rates are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The chart shows total cases per calendar date, new cases in the last 7 days per state, and the rate (cases/100,000) per state.

Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction.
