### U.S. Laboratory Confirmed Influenza-Associated Hospitalizations and Deaths from August 30 to November 14, 2009

Posted November 20, 2009, 11:00 AM ET

Data reported to CDC by November 17, 2009, 12:00 AM ET

Cases Defined by	Hospitalizations	Deaths
<b>Influenza Laboratory-Tests**</b>	<b>26,315</b>	<b>1,049</b>

\*Reports can be based on syndromic, admission or discharge data, or a combination of data elements that could include laboratory-confirmed and influenza-like illness hospitalizations.

\*Laboratory confirmation includes any positive influenza test (rapid influenza tests, RT-PCR, DFA, IFA, or culture), whether or not typing was done.

The table shows aggregate reports of all laboratory confirmed influenza hospitalizations and deaths (including 2009 H1N1 and seasonal flu) since August 30, 2009 received by CDC from U.S.

states and territories\*\*. This table will be updated weekly each Friday at 11 a.m. For the 2009-2010 influenza season, states are reporting based on new case definitions for hospitalizations and deaths effective August 30, 2009.

CDC will continue to use its traditional surveillance systems to track the progress of the 2009-2010 influenza season. For more information about influenza surveillance, including reporting of influenza-associated hospitalizations and deaths, see [Questions and Answers: Monitoring Influenza Activity, Including 2009 H1N1](#).

The number of 2009 H1N1 hospitalizations and deaths reported to CDC from April – August 2009 is available on the [Past Situation Updates](#) page.

For state level information, refer to [state health departments](#).

International Human Cases of 2009 H1N1 Flu Infection

See: [World Health Organization](#)  .

\*\*States report weekly to CDC either 1) laboratory-confirmed influenza hospitalizations and deaths or 2) pneumonia and influenza syndrome-based cases of hospitalization and death resulting from all types or subtypes of influenza. Although only the laboratory confirmed cases are included in this report, CDC continues to analyze data both from laboratory confirmed and syndromic hospitalizations and deaths.

#### U.S. Influenza-associated Pediatric Mortality

Posted November 20, 2009 (Updated each Friday)

Data reported to CDC by November 14, 2009

<b>Date Reported</b>	<b>Laboratory-Confirmed 2009 H1N1 Influenza Pediatric Deaths</b>	<b>Laboratory-Confirmed Influenza A Subtype Unknown Pediatric Deaths</b>	<b>Laboratory-Confirmed Seasonal Influenza</b>	<b>Total</b>
<b>This Week (Week 45, November 8-14, 2009)</b>	15	6	0	21
<b>Since August 30, 2009</b>	113	25	0	138
<b>Cumulative since April 26, 2009</b>	171	28	1	200

This table is based on data reported to CDC through the [Influenza-Associated Pediatric Mortality Surveillance System](#). Influenza-associated deaths in children (persons less than 18 years) was added as nationally notifiable condition in 2004.

For more information about influenza-associated pediatric mortality, see [FluView](#).
