District of Columbia	3,396	
West Virginia	3,237	
Virginia	3,182	
Washington	2,520	
Oregon	2,107	
New Hampshire	2,107	
Puerto Rico	1,861	
Virgin Islands	1,656	
Hawaii	1,300	
Maine	1,110	
Vermont	844	
Republic of Marshall Islands	7	
American Samoa	5	
Federated States of Micronesia	0	
Northern Mariana Islands	0	
Palau	0	

Data Sources, References & Notes: Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. The numbers are confirmed and probable COVID-19 cases as reported by

View and Download COVID-19 Case Surveillance Public Use Data

U.S. states, U.S. territories, New York City, and the District of Columbia from the previous day. \*Counts for New York City and New York state are shown separately; data for New York State show total cases and deaths for the State excluding data for NYC. When not available to CDC this is annotated by N/A. Rates are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The map shows total cases per state, new cases in the last 7 days per state, and the rate (cases/100,000) per state. The 7-day moving average of new cases (current day + 6 preceding days / 7) was calculated to smooth expected variations in daily counts. Demographic data for deaths is based on a subset of cases where case-level data is available. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ. **HAVE QUESTIONS?** Privacy **CONNECT WITH CDC CDC INFORMATION**
