Cases and Deaths by State | US and State Trends | Compare State Trends | Demographics | Trends by Population Factors | Forecasting | Trends in ED Visits

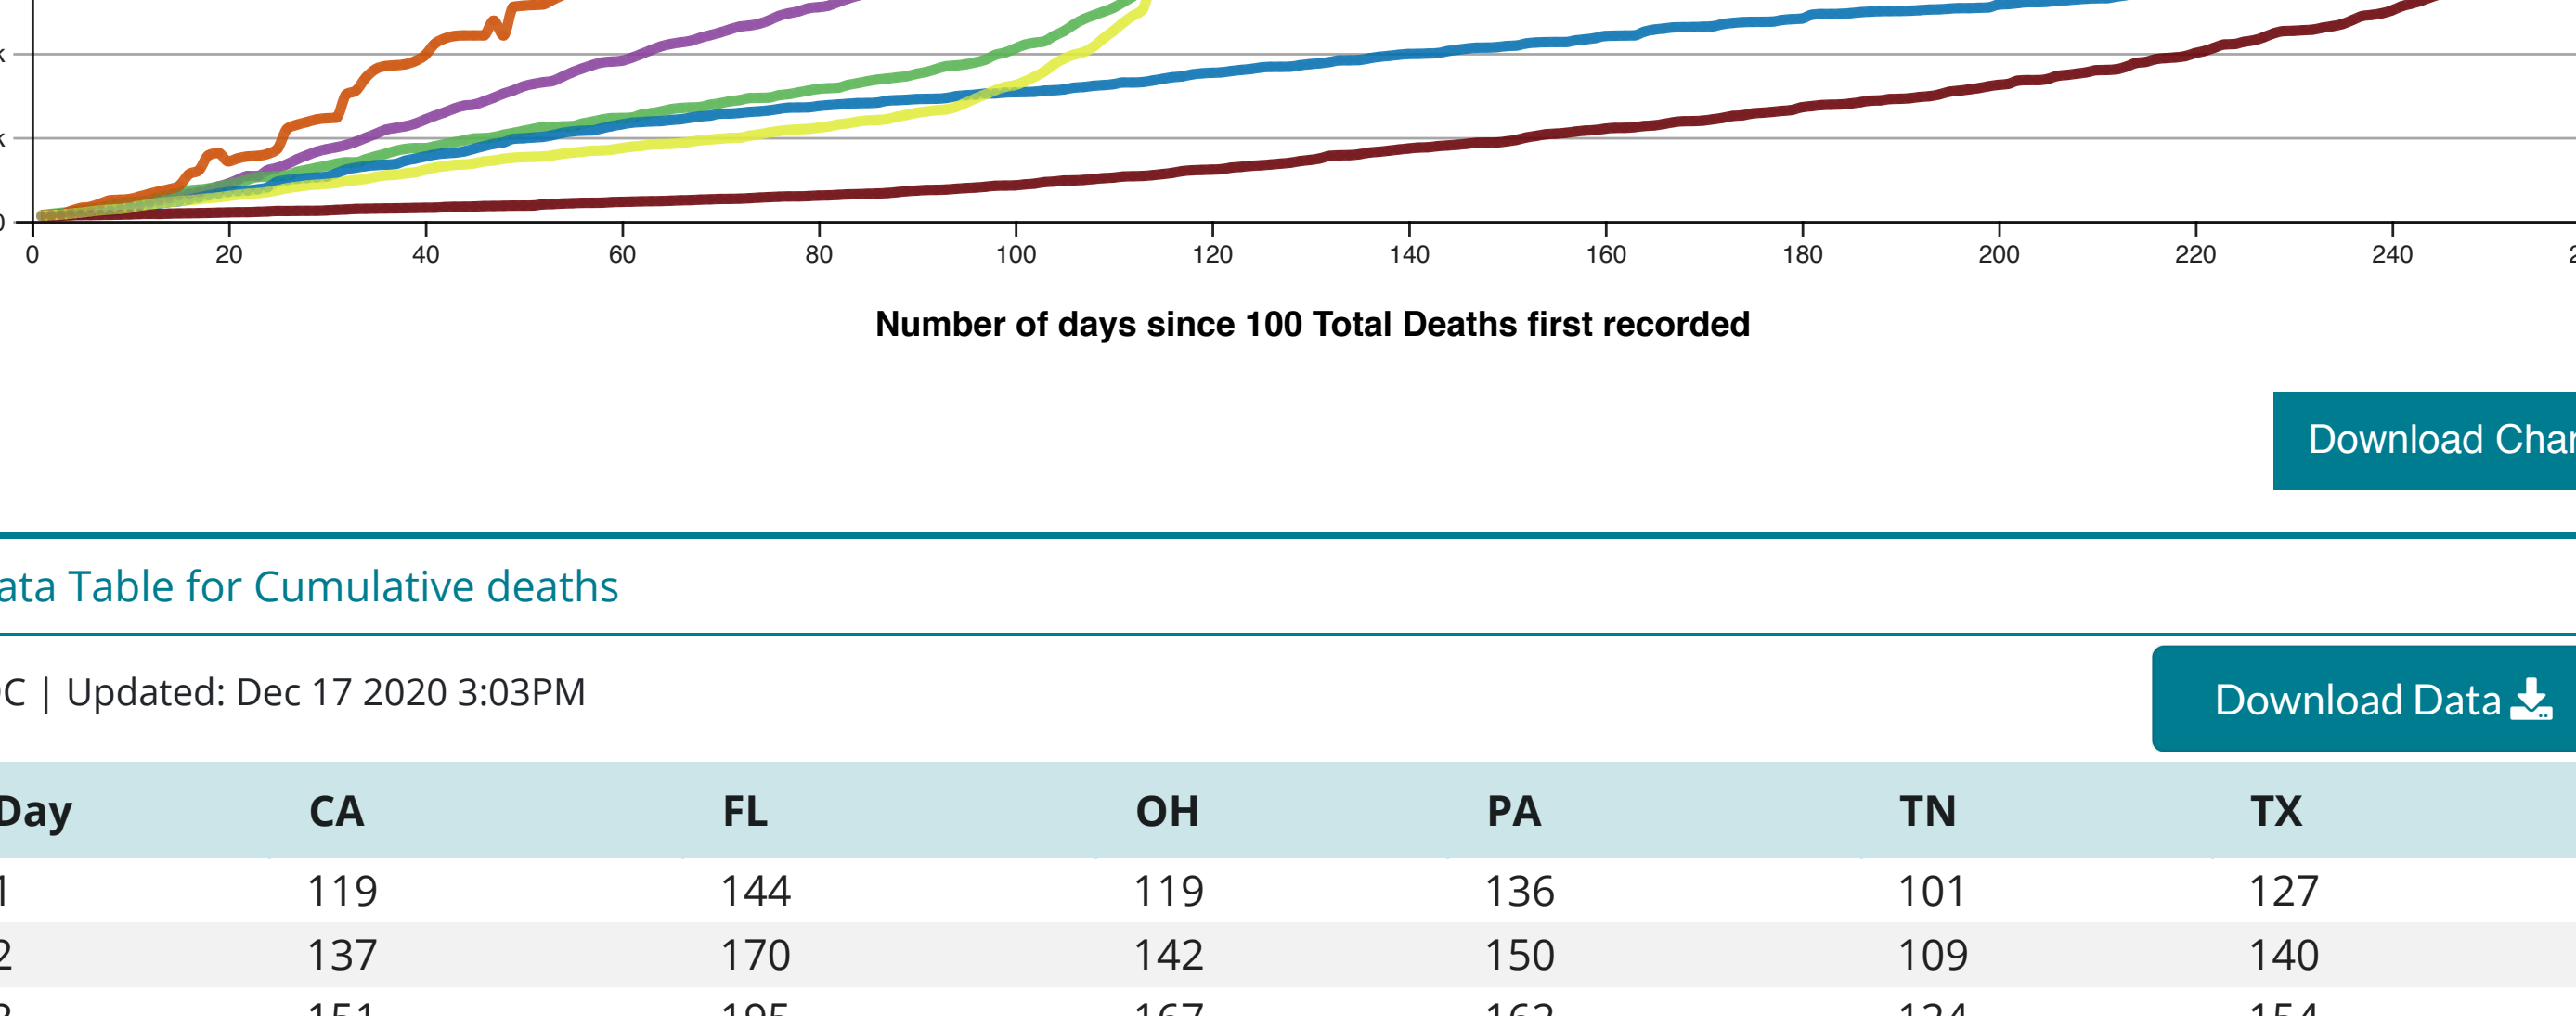

Compare Trends in COVID-19 Cases and Deaths in the US

Reported to the CDC by State or Territory

View: Cases (selected) / Deaths | Measure: Daily (selected) / Cumulative | Metric: Raw Totals (selected) / Rate per 100,000 | Scale: Linear (selected) / Logarithmic

Select up to 6 states or territories: California x Florida x Ohio x Pennsylvania x Tennessee x Texas x

Cumulative deaths attributed to Covid-19, reported to CDC, in CA, FL, OH, PA, TN, and TX
Cumulative deaths, by number of days since 100 total deaths first recorded.

Data Table for Cumulative deaths

CDC | Updated: Dec 17 2020 3:03PM

Table with columns: Day, CA, FL, OH, PA, TN, TX. Contains 264 rows of cumulative death data for each state.

Data Sources, References & Notes: Total cases are based on aggregate counts of COVID-19 cases sent by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. Case and death data are charted from date of first case/death rather than calendar date. The numbers are confirmed and probable COVID-19 cases as reported by U.S. states and U.S. territories. When not available to CDC, this is annotated by N/A.

Rates are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The chart shows total cases per state, new cases in the last 7 days per state, and the rate (cases/100,000) per state. The 7-day moving average of new cases (current day + 6 preceding days / 7) was calculated to smooth expected variations in daily counts.

Case numbers reported on other jurisdictions may differ from what is posted on CDC's website because CDC's overall case numbers are processed through a confirmation process with each jurisdiction. Differences between reporting websites and CDC's website may occur due to the timing of CDC's website updates. The values used for finding and confirming cases displayed by other sites may differ. *Counts for New York City and New York state are shown separately; data for New York State show total cases and deaths for the State excluding data for NYC.
