United States COVID-19 Cases and Deaths by State

Reported to the CDC since January 21, 2020

TOTAL CASES

17,592,760

+201,490 New Cases

CASES IN LAST 7 DAYS

1,660,650

TOTAL DEATHS

315,260

+2,624 New Deaths

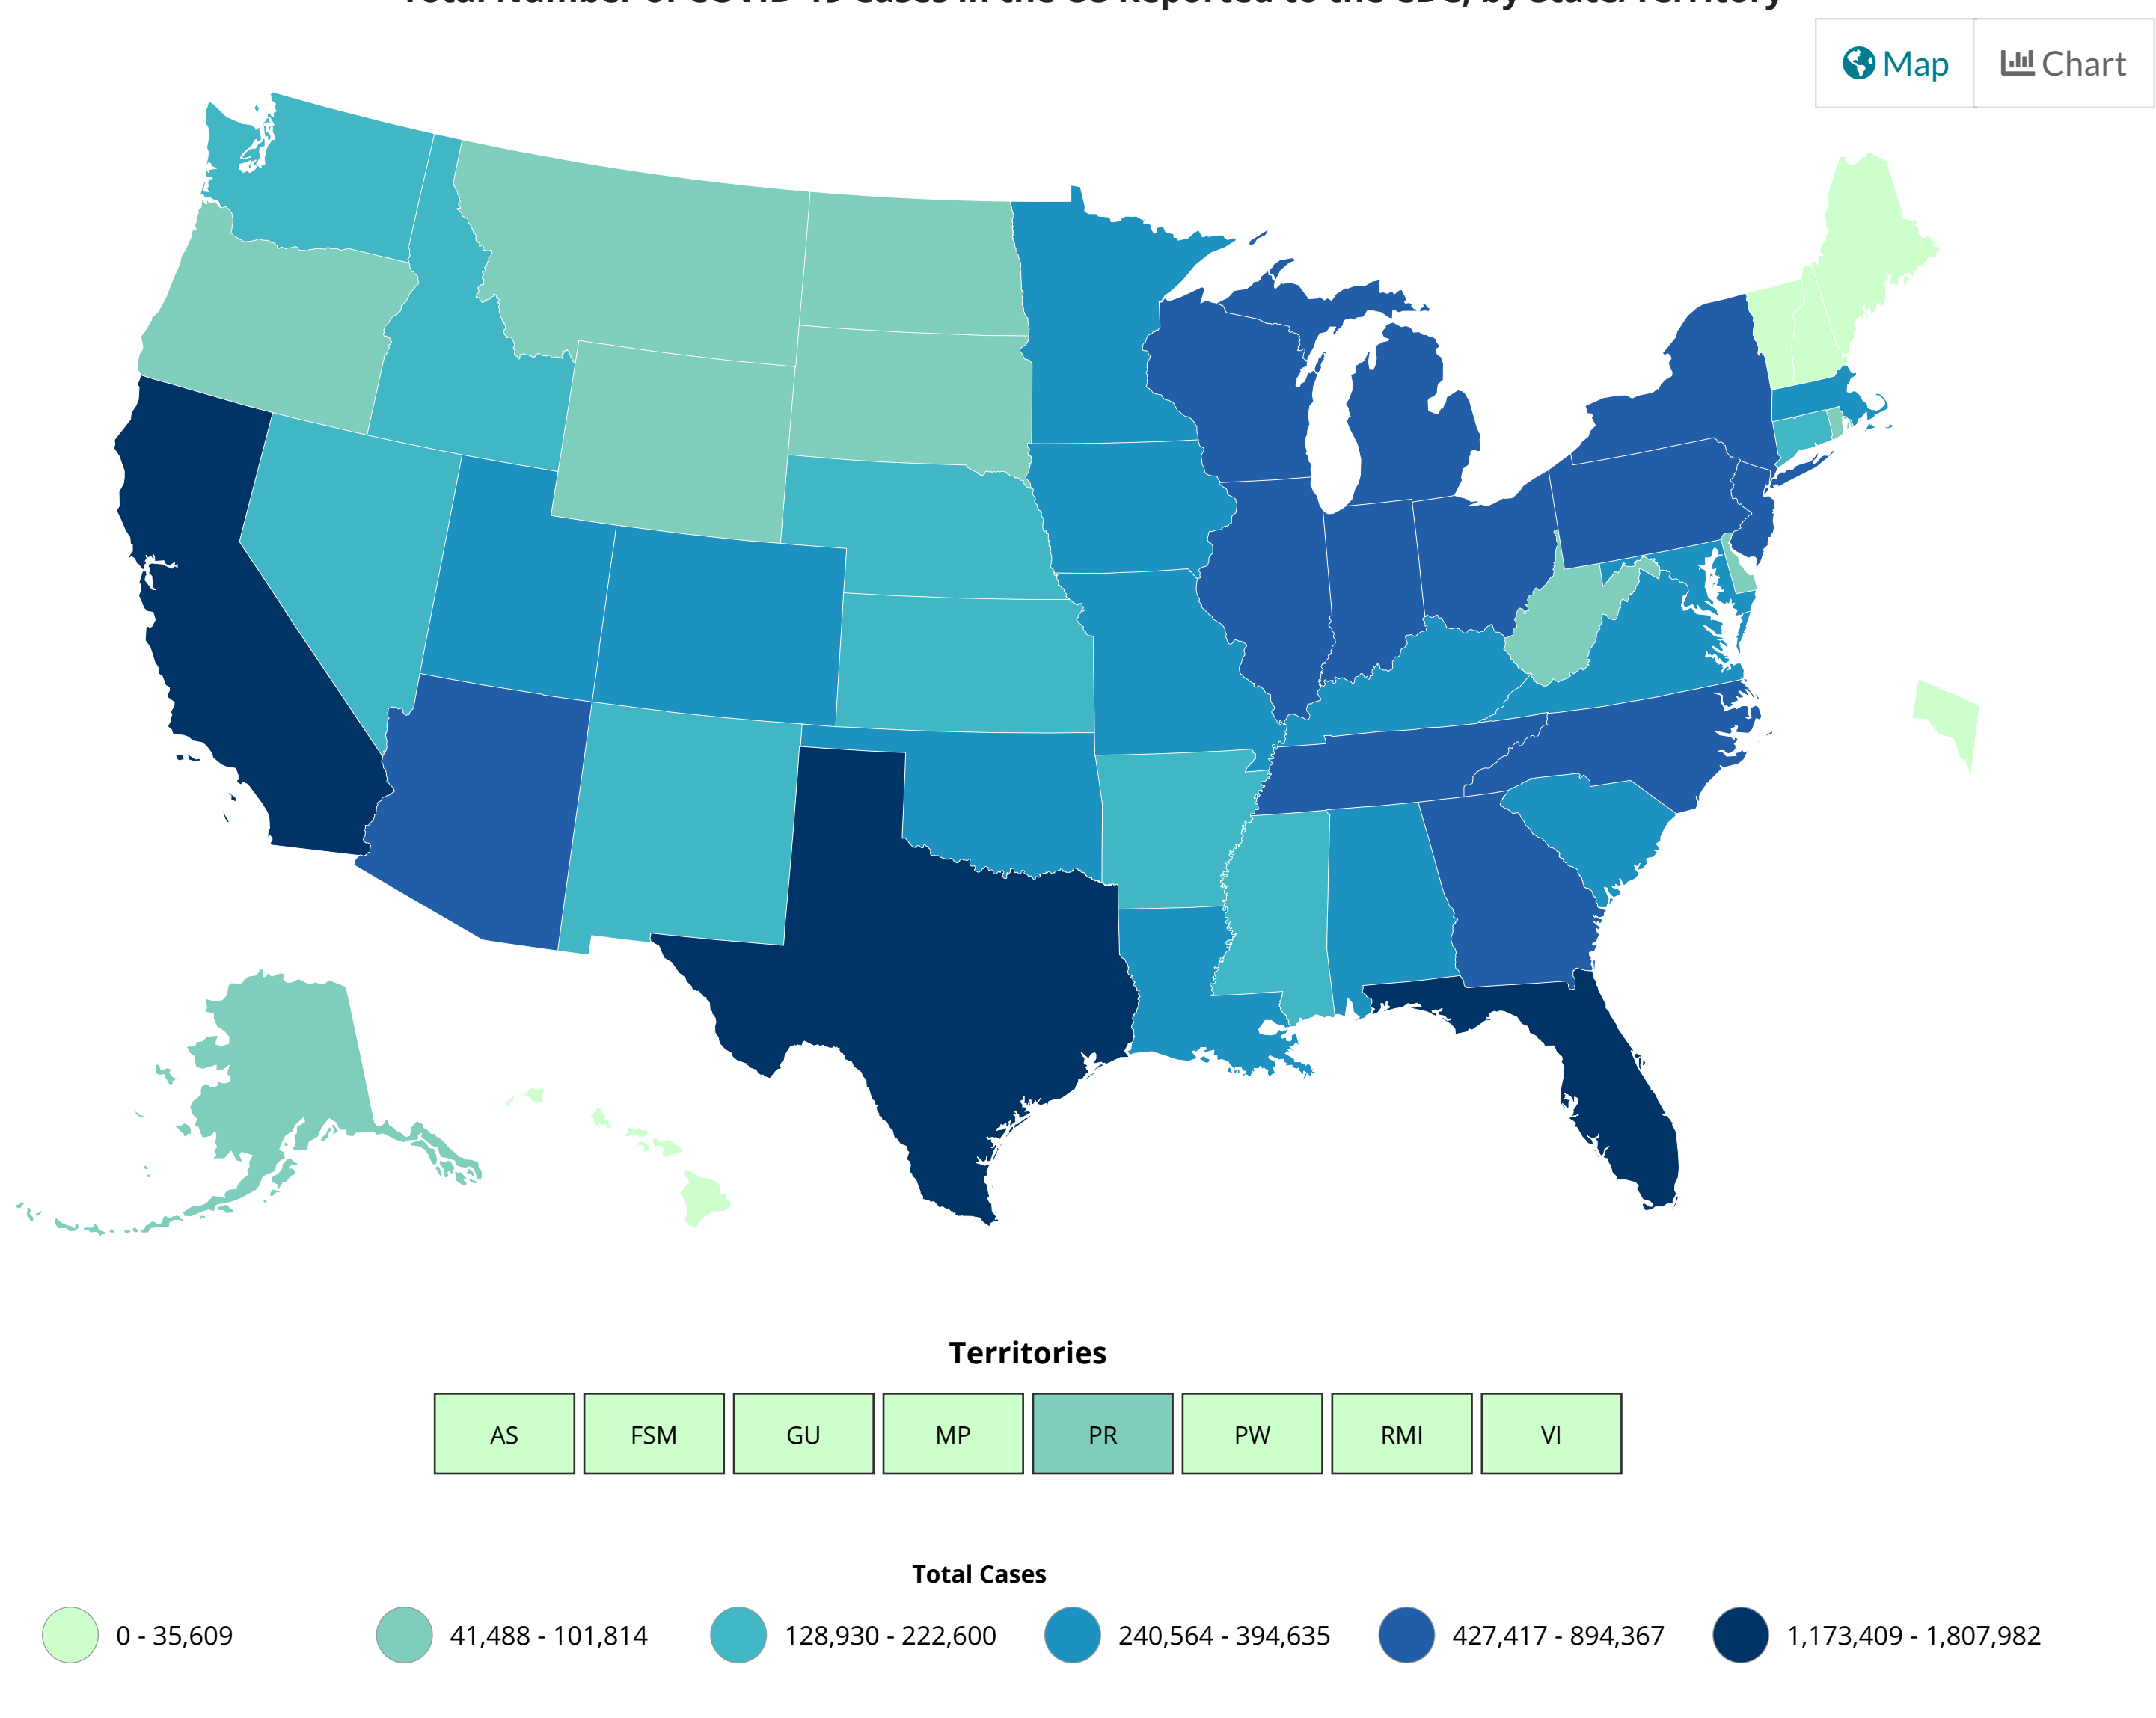

CDC | Updated: Dec 20 2020 12:16PM

View: Cases Deaths

Time period: Last 7 Days Since Jan 21, 2020

Metric: Count Rate per 100,000

Total Number of COVID-19 Cases in the US Reported to the CDC, by State/Territory

American Samoa	3	N/A	N/A
Federated States of Micronesia	0	0	0
Palau	0	N/A	N/A

[View and Download](#) COVID-19 Case Surveillance Public Use Data

Data Sources, References & Notes: Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. The numbers are confirmed and probable COVID-19 cases as reported by U.S. states, U.S. territories, New York City, and the District of Columbia from the previous day. *Counts for New York City and New York state are shown separately; data for New York State show total cases and deaths for the State excluding data for NYC. When not available to CDC this is annotated by N/A. Rates are calculated using U.S. Census Bureau, 2018 American Community Survey 1-year estimates and are shown as cases/100,000 people. The map shows total cases per state, new cases in the last 7 days per state, and the rate (cases/100,000) per state. The 7-day moving average of new cases (current day + 6 preceding days / 7) was calculated to smooth expected variations in daily counts. Demographic data for the state is based on a subset of cases where case-level data is available. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ.

On December 18, 2020, Texas started reporting probable cases, which included 171,505 new probable cases, in addition to 13,253 confirmed cases, for a total of 184,758 new cases reported. This raised the total number of new cases in the US on December 18 to 403,359; without the influx of reporting from Texas, the daily new case count for the US would have been 231,854.
