

NONMETAL OPERATOR MINING FACTS – 2007

Mining Operations

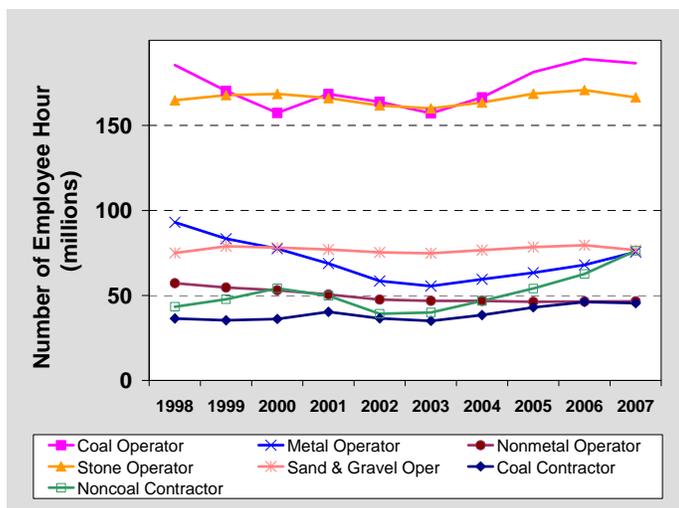

In 2007, a total of 725 nonmetal mining operations reported employment to the Mine Safety and Health Administration (MSHA).¹ Nonmetal mines comprised 4.9% of all mining operations.

- Mines producing common clay comprised 25.4% (n=184) of all nonmetal mining operations.
- Nonmetal mining operations were located in all states and territories except Alaska, Delaware, Hawaii, Maine, New Hampshire, Rhode Island, Puerto Rico, and the U.S. Virgin Islands.

Employees

A total of 22,864 employees,² corresponding to 23,265 full-time equivalent (FTE)³ employees, were reported to MSHA by nonmetal mine operators in 2007.

- Within the mining sectors,⁴ nonmetal mine operator employees accounted for 6.9% of all employee hours reported.
- Employee hours were reported at underground (10.7%) and surface (89.3%) work locations.⁵

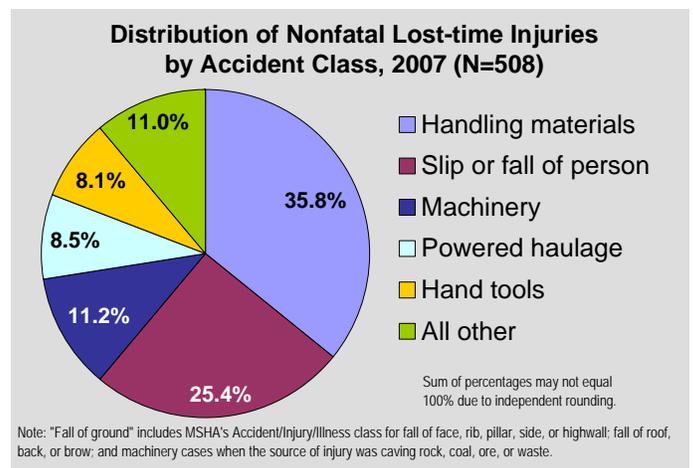

Fatalities

There was one work-related fatality in nonmetal mines in 2007. There were no fatalities in 2006.

Nonfatal Lost-time Injuries

There were 508 nonfatal lost-time injuries (91 at underground and 417 at surface work locations) among nonmetal operator employees occurring at an overall rate of 2.5 injuries per 100 FTE employees. A total of 26,954 days lost from work⁶ resulted from these injuries.

- The underground nonfatal lost-time injury rate was greater than the surface injury rate (3.7 vs. 2.4 per 100 FTE workers).
- In 2007, the most frequent classification of nonfatal lost-time injuries involved handling materials (n=182; 35.8%).
- Sprains and strains were the most frequently reported nature of injury (n=231; 45.5%).
- The back was the most frequently reported body part injured (n=84; 16.5%) and accounted for 3,864 days lost from work.

Mine and Employment Characteristics, 2007

Commodity and Type of Employer	Number of Mining Operations ¹			Number of Employees ²			Number of FTE Employees ³		
	Underground	Surface	Total	Underground	Surface	Total	Underground	Surface	Total
Coal Operator	631	1,399	2,030	37,829	46,242	84,071	42,238	51,027	93,265

NA Not applicable.

Data source: Publicly released data files of employment and accident/injury/illness collected by MSHA under 30 CFR 50.

Notes: All analyses of accident data exclude office employees. Occupational fatalities exclude all cases under 17 years of age. Further statistical methodology is available on the NIOSH Internet [<http://www.cdc.gov/niosh/mining/statistics/method.htm>]. Data in the above tables may not add to totals shown because of independent rounding. Caution should be used when interpreting rates based on a small number of events.

¹Mines at which only independent contractors were working did not show any employment and were not counted.

²Average number of employees working at individual mines during calendar quarters of active operations (includes office workers).

³Full-time equivalent employees computed using reported employee hours (2,000 hours = 1 FTE).

⁴Mining sectors include coal operators, metal operators, nonmetal operators, stone operators, sand and gravel operators, coal contractors, and noncoal contractors.

⁵Surface work locations include surface operations at underground mines, surface operations (strip or open pit), dredge, other surface operations, independent shops and yards, and mills or preparation plants.

⁶Includes actual days away from work and/or days of restricted work activity. For permanently disabling injuries only, statutory days charged by MSHA were used if they exceeded the total lost workdays.
