Data on COVID-19 during Pregnancy: Severity of Maternal Illness

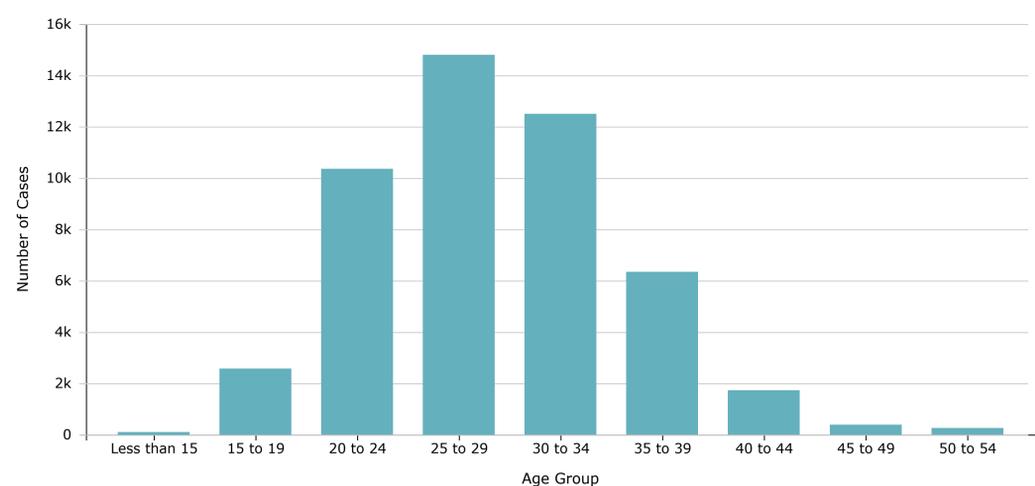

Monitoring the impact of COVID-19 during pregnancy can protect pregnant women and their babies.

Pregnant women¹ with COVID-19, United States, January 22 - December 21, 2020

Pregnant women with COVID-19 by age, United States, January 22 - December 21, 2020

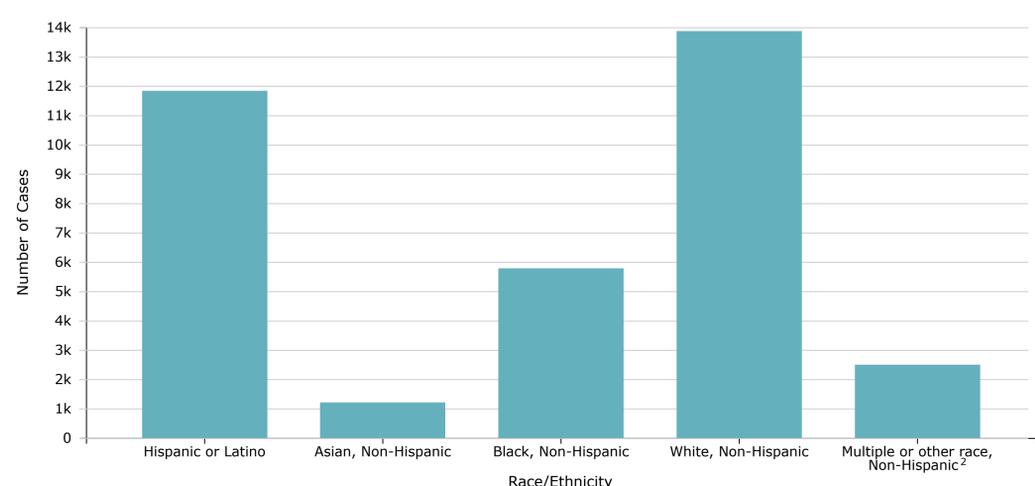

Data were collected from 49,036 women, and age was available for 49,036 (100%) women.

[Download Chart](#)

Pregnant women with COVID-19 by race/ethnicity, United States, January 22 - December 21, 2020

Data were collected from 49,036 women, but race/ethnicity was only available for 35,183 (71.7%) women.

Data Table for COVID-19 during Pregnancy

CDC | Updated: December 21, 2020

[Download Data](#)

Category	Value
Total Cases	49036
Total Deaths	60
Total Cases with Known Age	49036
Total Cases with Unknown Age	0
Percent Cases with Known Age	100
Cases less than 15 years	103
Cases 15 to 19 years	2574
Cases 20 to 24 years	10353
Cases 25 to 29 years	14804
Cases 30 to 34 years	12498
Cases 35 to 39 years	6341
Cases 40 to 44 years	1724
Cases 45 to 49 years	387
Cases 50 to 54 years	252
Total Cases with Known Race/Ethnicity	35183
Percent Cases with Known Race/Ethnicity	71.7
Total Cases Hispanic or Latino	11834
Total Cases Asian, Non-Hispanic	1204
Total Cases Black, Non-Hispanic	5775
Total Cases White, Non-Hispanic	13872
Total Cases Multiple, Non-Hispanic	2498
Total Hospitalized Cases	9074
Total Cases Known Hospitalization Status	40580
Percent with Known Hospitalization Status	82.8
Total Cases with Known ICU Status	9703
Percent with Known ICU Status	19.8
Total Cases with Known Ventilation Status	7589
Percent with Known Ventilation Status	15.5
Total Cases with Known ECMO Status	7626
Percent with Known ECMO Status	15.6
Total ICU Cases	308
Total Ventilation Cases	85
Total ECMO Cases	19

About the Data : This page is updated weekly. The cases reported are only confirmed cases with laboratory evidence of SARS-CoV-2 infection. There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S Virgin Islands. Because only about a third of case report forms include information on pregnancy status, these numbers likely do not include all pregnant women with COVID-19 in the United States and must be interpreted with caution. The completeness of this variable continues to improve each week. Increases in the total number of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur because of the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes. As of October 2020, CDC will exclude reports of cases of COVID-19 among pregnant women who are younger than age 9 and older than age 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages less than 9 or greater than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included. For more information on how CDC collects COVID-19 surveillance data, see [FAQ COVID-19 Data and Surveillance](#)
