Data Table for Case Rate by State/Territory

CDC | Updated: Dec 22 2020 7:02PM

[Download Data](#)

State/Territory	Case Rate per 100,000
North Dakota	11,900
South Dakota	10,776
Wisconsin	8,503
Iowa	8,495
Nebraska	8,143
Utah	7,997
Tennessee	7,822
Rhode Island	7,588
Idaho	7,461
Wyoming	7,290
Montana	7,279
Minnesota	7,116
Illinois	7,104
Kansas	7,027
Indiana	6,997
Oklahoma	6,908
Nevada	6,785
Arkansas	6,739
Alabama	6,646
Mississippi	6,619
Arizona	6,433
New Mexico	6,242
Louisiana	6,164
Missouri	6,012
Alaska	5,772
Georgia	5,622
Florida	5,599
Texas	5,546
Kentucky	5,467
Colorado	5,461
South Carolina	5,423
Ohio	5,384
Delaware	5,279
Michigan	5,018
New Jersey	4,892
California	4,784
Massachusetts	4,705
Connecticut	4,685
New York City*	4,679
North Carolina	4,658
Pennsylvania	4,401
Guam	4,366
New York*	4,247
Maryland	4,226
West Virginia	4,061
District of Columbia	3,807
Virginia	3,692
Washington	3,008
New Hampshire	2,756
Oregon	2,476
Puerto Rico	2,188
Virgin Islands	1,835
Maine	1,441
Hawaii	1,410
Vermont	1,043
Republic of Marshall Islands	7
American Samoa	5
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and analyzing COVID-19 cases and deaths displayed by other sites may differ.

On 18 December Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
