CDC | Updated: Dec 23 2020 12:25PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	307,637
Texas	112,557
Florida	77,918
Pennsylvania	62,231
Tennessee	61,144
Ohio	57,675
Illinois	47,831
New York*	47,168
Georgia	46,522
Arizona	42,833
North Carolina	42,301
Indiana	37,234
Massachusetts	31,277
New Jersey	30,922
Alabama	28,278
Virginia	26,893
Michigan	26,458
New York City*	25,577
Oklahoma	23,698
Washington	22,818
Wisconsin	22,040
South Carolina	20,735
Colorado	20,170
Missouri	20,074
Kentucky	19,526
Louisiana	18,684
Utah	17,298
Minnesota	16,847
Maryland	16,095
Arkansas	15,850
Nevada	15,242
Mississippi	14,682
Kansas	14,582
Connecticut	13,498
Iowa	10,611
New Mexico	9,518
West Virginia	9,029
Oregon	8,981
Idaho	8,575
Nebraska	7,463
Puerto Rico	6,802
Rhode Island	5,950
New Hampshire	5,463
Delaware	4,306
Montana	3,907
South Dakota	3,810
Maine	3,198
Alaska	2,563
Wyoming	2,315
North Dakota	2,227
District of Columbia	1,561
Hawaii	912
Vermont	685
Guam	89
Virgin Islands	84
Northern Mariana Islands	3
American Samoa	0
Federated States of Micronesia	0
Palau	0
Republic of Marshall Islands	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
