Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Dec 28 2020 1:36PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	268,350
Texas	86,929
Florida	68,726
Pennsylvania	54,181
Ohio	47,719
New York*	47,312
Tennessee	44,393
Georgia	44,381
Arizona	40,740
North Carolina	37,660
Illinois	37,539
New York City*	30,065
Indiana	29,487
New Jersey	28,629
Massachusetts	27,614
Virginia	25,286
Alabama	23,176
Michigan	20,270
Oklahoma	19,056
Missouri	18,430
Colorado	16,128
Maryland	16,110
Wisconsin	15,856
South Carolina	15,486
Kentucky	14,742
Utah	13,910
Louisiana	13,577
Nevada	13,564
Arkansas	13,227
Washington	12,672
Mississippi	12,589
Minnesota	11,742
Connecticut	9,961
Kansas	9,263
West Virginia	8,368
New Mexico	7,975
Iowa	7,733
Oregon	6,795
Idaho	6,255
Nebraska	5,592
Puerto Rico	4,809
Delaware	4,441
New Hampshire	4,267
Rhode Island	4,254
Maine	3,035
South Dakota	2,663
Montana	2,610
Alaska	1,867
District of Columbia	1,601
Wyoming	1,538
North Dakota	1,437
Hawaii	738
Vermont	586
Guam	88
Virgin Islands	67
Northern Mariana Islands	6
American Samoa	0
Federated States of Micronesia	0
Palau	0
Republic of Marshall Islands	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (https://wwwn.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (https://www2.census.gov/programs-surveys/popnet/totals/na-est2019-01.xlsx). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
