Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Jan 2 2021 3:47PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	250,278
Texas	114,626
Florida	73,998
New York*	56,115
Georgia	52,959
Pennsylvania	50,479
Ohio	46,730
Arizona	43,332
Tennessee	40,305
New York City*	32,552
Illinois	32,540
Massachusetts	31,138
North Carolina	30,986
Indiana	29,593
Virginia	29,178
New Jersey	27,959
Alabama	23,321
South Carolina	22,479
Michigan	20,172
Utah	19,133
Oklahoma	18,838
Louisiana	18,776
Missouri	18,412
Kansas	18,056
Maryland	17,731
Wisconsin	17,178
Arkansas	16,175
Mississippi	15,254
Kentucky	14,982
Colorado	14,972
Washington	13,659
Nevada	12,982
Connecticut	12,965
Minnesota	10,899
West Virginia	8,984
Iowa	8,651
New Mexico	7,520
Nebraska	6,554
Oregon	6,191
Rhode Island	5,883
Idaho	5,844
Puerto Rico	5,489
New Hampshire	5,126
Delaware	4,411
Maine	3,696
Montana	2,626
South Dakota	2,618
Alaska	1,832
District of Columbia	1,816
Wyoming	1,745
North Dakota	1,536
Hawaii	830
Vermont	809
Virgin Islands	57
Guam	42
American Samoa	0
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0
Republic of Marshall Islands	0

**Data Sources, References & Notes:** The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates.

\*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
