## United States COVID-19 Cases and Deaths by State

Reported to the CDC since January 21, 2020

TOTAL CASES

19,432,125

+199,282 New Cases

CASES PER 100,000

PEOPLE

5,853

TOTAL DEATHS

337,419

+3,390 New Deaths

CDC | Updated: Dec 30 2020 5:09PM

### Data Table for Case Rate by State/Territory

CDC | Updated: Dec 30 2020 5:09PM

Download Data

State/Territory	Case Rate per 100,000
North Dakota	12,099
South Dakota	11,096
Wisconsin	8,812
Iowa	8,787
Nebraska	8,467
Utah	8,401
Tennessee	8,384
Rhode Island	8,193
Idaho	7,667
Wyoming	7,589
Montana	7,525
Illinois	7,481
Indiana	7,431
Oklahoma	7,419
Kansas	7,416
Minnesota	7,290
Arkansas	7,265
Alabama	7,175
Mississippi	7,159
Nevada	7,146
Arizona	6,969
New Mexico	6,671
Louisiana	6,550
Missouri	6,291
Alaska	6,094
Georgia	6,081
Texas	5,918
Florida	5,913
Kentucky	5,853
Ohio	5,839
South Carolina	5,838
Delaware	5,770
Colorado	5,703
California	5,536
New Jersey	5,265
Michigan	5,245
Massachusetts	5,170
Connecticut	5,104
New York City*	5,096
North Carolina	4,999
Pennsylvania	4,861
New York*	4,782
West Virginia	4,619
Maryland	4,527
Guam	4,409
District of Columbia	4,043
Virginia	4,034
Washington	3,163
New Hampshire	3,140
Oregon	2,637
Puerto Rico	2,376
Virgin Islands	1,920
Maine	1,748
Hawaii	1,465
Vermont	1,154
Republic of Marshall Islands	7
American Samoa	5
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0

**Data Sources, References & Notes:** The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://wwwn.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates.

\*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
