CDC COVID Data Tracker

Maps, charts, and data provided by the CDC

In observance of New Year's Day, the COVID Data Tracker will not update on Friday, January 1st.

Updates will resume on Saturday, January 2nd.

United States COVID-19 Cases and Deaths by State

Reported to the CDC since January 21, 2020

TOTAL CASES	CASES PER 100,000 PEOPLE	TOTAL DEATHS
19,663,976	5,923	341,199
+230,337 New Cases		+3,764 New Deaths

CDC | Updated: Dec 31 2020 12:20PM

Data Table for Case Rate by State/Territory

CDC | Updated: Dec 31 2020 12:20PM

Download Data

State/Territory	Case Rate per 100,000
North Dakota	12,138
South Dakota	11,159
Wisconsin	8,866
Iowa	8,842
Nebraska	8,545
Tennessee	8,505
Utah	8,482
Rhode Island	8,302
Idaho	7,826
Kansas	7,635
Wyoming	7,626
Montana	7,607
Illinois	7,539
Oklahoma	7,510
Indiana	7,502
Arkansas	7,371
Minnesota	7,325
Alabama	7,277
Mississippi	7,251
Nevada	7,227
Arizona	7,041
New Mexico	6,733
Louisiana	6,695
Missouri	6,336
Georgia	6,167
Alaska	6,147
Texas	5,992
Florida	5,977
Kentucky	5,937
Ohio	5,909
South Carolina	5,894
Delaware	5,812
Colorado	5,745
California	5,614
New Jersey	5,317
Michigan	5,293
Massachusetts	5,259
Connecticut	5,151
New York City*	5,146
North Carolina	5,080
Pennsylvania	4,932
New York*	4,861
West Virginia	4,700
Maryland	4,576
Guam	4,409
Virginia	4,096
District of Columbia	4,075
Washington	3,182
New Hampshire	3,180
Oregon	2,662
Puerto Rico	2,389
Virgin Islands	1,940
Maine	1,799
Hawaii	1,473
Vermont	1,166
Republic of Marshall Islands	7
American Samoa	5
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0

View and Download COVID-19 Case Surveillance Public Use Data

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (https://wwwn.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
