United States COVID-19 Cases and Deaths by State

Reported to the CDC since January 21, 2020

TOTAL CASES
20,346,372
+284,554 New Cases

CASES IN LAST 7 DAYS
1,436,460

TOTAL DEATHS
349,246
+2,321 New Deaths

Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Jan 3 2021 12:16PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	273,244
Texas	116,695
Florida	87,941
New York*	59,104
Georgia	56,334
Pennsylvania	52,151
Ohio	50,005
Arizona	46,109
North Carolina	44,507
Tennessee	43,240
Illinois	41,210
New York City*	33,245
Massachusetts	32,256
Indiana	31,069
Virginia	30,189
New Jersey	29,471
Alabama	26,000
Oklahoma	24,157
South Carolina	23,826
Michigan	21,795
Missouri	18,813
Louisiana	18,776
Kentucky	18,408
Maryland	18,121
Kansas	18,056
Wisconsin	17,630
Utah	17,576
Arkansas	17,473
Connecticut	17,377
Mississippi	15,673
Colorado	15,553
Nevada	13,218
Minnesota	11,287
Washington	10,033
West Virginia	9,150
Iowa	8,924
New Mexico	8,153
Oregon	8,022
Nebraska	6,925
Idaho	6,412
Rhode Island	5,883
New Hampshire	5,251
Puerto Rico	4,942
Delaware	4,400
Maine	3,709
South Dakota	2,866
Montana	2,511
Alaska	2,272
District of Columbia	1,799
North Dakota	1,576
Wyoming	1,427
Hawaii	880
Vermont	723
Virgin Islands	53
Guam	42
American Samoa	0
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0
Republic of Marshall Islands	0

[View and Download](#) COVID-19 Case Surveillance Public Use Data

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
