Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Jan 4 2021 12:16PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	268,455
Texas	124,744
Florida	91,012
New York*	62,351
Arizona	62,047
Georgia	58,601
Pennsylvania	51,846
Ohio	50,956
North Carolina	48,096
Tennessee	44,217
Illinois	41,912
New York City*	33,835
South Carolina	32,777
Massachusetts	32,393
Indiana	32,230
Virginia	31,361
New Jersey	30,821
Alabama	26,306
Oklahoma	23,161
Michigan	21,795
Louisiana	21,336
Kentucky	19,763
Missouri	19,341
Maryland	18,619
Utah	18,599
Arkansas	18,598
Kansas	18,056
Washington	17,963
Wisconsin	17,665
Connecticut	17,377
Colorado	16,232
Mississippi	15,588
Nevada	14,109
Minnesota	11,483
West Virginia	10,348
Iowa	9,396
New Mexico	8,426
Oregon	8,020
Nebraska	7,026
Idaho	6,292
Rhode Island	5,883
New Hampshire	5,641
Puerto Rico	5,147
Delaware	4,427
Maine	3,646
South Dakota	3,142
Montana	2,601
Alaska	2,272
North Dakota	1,682
Wyoming	1,675
District of Columbia	1,562
Hawaii	908
Vermont	764
Guam	63
Virgin Islands	54
American Samoa	0
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0
Republic of Marshall Islands	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
