State/Territory	Cases in Last 7 Days
California	264,918
Texas	128,097
Florida	93,907
New York*	62,950
Georgia	59,823
Arizona	57,119
Ohio	52,379
Pennsylvania	51,293
North Carolina	49,395
Tennessee	44,458
Illinois	42,518
New York City*	33,597
Indiana	33,382
Massachusetts	32,691
Virginia	31,616
New Jersey	30,352
South Carolina	27,422
Alabama	26,198
Michigan	23,735
Oklahoma	23,429
Louisiana	21,642
Kentucky	20,626
Missouri	19,341
Utah	19,043
Maryland	18,697
Arkansas	18,253
Washington	17,763
Wisconsin	17,734
Colorado	16,767
Mississippi	15,412
Kansas	15,255
Nevada	14,655
Minnesota	13,550
Connecticut	13,436
West Virginia	10,450
Iowa	9,593
New Mexico	8,656
Oregon	7,908
Rhode Island	7,106
Nebraska	6,736
Idaho	6,295
New Hampshire	5,658
Delaware	4,144
Maine	3,654
Puerto Rico	3,529
South Dakota	2,986
Montana	2,665
Alaska	2,406
District of Columbia	1,562
Wyoming	1,543
North Dakota	1,411
Hawaii	938
Vermont	753
Guam	64
Virgin Islands	51
American Samoa	0
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0
Republic of Marshall Islands	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
